

Assessment 02: Mid-project report

Your task consists of two parts:

1. Write a mid-project progress report that is accessible to a non-specialist.
2. Upload one finished deliverable of your project

The report should include

- An updated and more detailed goal of the project,
- a high-level description of the current status of the project with an explicit statement whether you are on track or not,
- an overview over the tasks that have been finished and those that are ongoing,
- a list of decisions that have been made (for instance, methods that have been chosen etc) and any finished deliverables,

It can also include a description of changes to the project plan or risk register.

You will marks for satisfying the following criteria:

- The goal clearly defines the output of the project (1 mark).
- The goal is linked to a question of the timetabling team and clearly states the added value for them (1 mark),
- The progress report gives us a clear indication how the project is progressing, any problems you are encountering, and how you deal with them (2 marks).
- Any changes to the project plan are well-evidenced, for instance by mentioning events that led to delays. If no changes are made, there should be evidence why the plan is still on track (for instance, by deliverables being on time etc) (1 mark).
- The report is written in such a way that it is accessible to a non-specialist (1 mark).
- The report is written well and does not contain too many formal errors (spelling, grammar, etc). (1 mark)
- The deliverable is the output of a substantial task (as indicated in the plan) and clearly satisfies the specification that you made in the plan (3 marks).

The progress report should fit on two pages A4 in single-spaced typescript in Arial 11 or other sans serif typeface of equivalent size, with margins of at least 2cm. Arial narrow and Calibri are not allowable font types.

Your deliverable can take any form, for instance, a document or a piece of code, depending on your project plan.
